

My agenda as a councilmember is focused on economic development, job creation, responsible spending of taxpayer dollars and setting policy that moves Banning towards prosperity. These goals include expanding economic opportunities, encouraging business friendly environments, providing incentives for business attraction, retention, and growth, ongoing support of our community college, capitalizing on our city's assets, and developing the area around the incoming courthouse.

As an individual council member I will continue to meet with residents, listening to their concerns, and working on solutions. My ongoing participation in transportation, Community Action Partnership, First 5, and as a committee member for the League of Cities, helps me bring resources and information to Banning which contribute to our growth and progress. Making our downtown area more attractive, improving our infrastructure, including water and electric facilities, are some of the achievements of the entire council. These are issues I have and will continue to whole- heartedly support.

As a volunteer throughout the city, I am able to interact with the heart of Banning... the people. The people matter most to me, and by being re-elected to the council, I can continue to make Banning a more business-friendly and family-oriented city for all.
