

Ballot Statement:

In this election you are faced with a referendum: do you want more of the same in City Council, or do you want to regain respect for citizen needs and opinions, accountability, and have new directions in planning and development of our City? When elected, here is what I stand for:

1. Water bond proceeds must only be spend on water infrastructure; to use water revenue for non-water purposes is unacceptable - it violates Prop.218.
2. Taxpayer's money should never be recklessly spent, but with responsibility, following basic business principles while reducing debt.
3. Full accountability for nearly one million dollars in taxpayer money given to the Banning Cultural Alliance.
4. The health and safety of Banning residents must never be compromised; the Liberty Energy sludge incinerator is a horrific example of what I consider completely misguided policy. That is why I personally brought forward the ballot petition which subsequently stopped this insane project.
5. The recommendations of a Grand Jury must be followed, not ignored.

My background includes master planning, business development, and fiscal accountability. I am a strong supporter of law enforcement, economic growth and development, and ethical government. I hold BA, Masters and PhD degrees.
